## Chapter 1

### The Ultimate Tale

**Read this short tale and (hopefully) be enlightened.**

In 1969, the US-Americans landed on the moon. Then they returned from the moon. People yelled: "Are you crazy?! You spent 20 billion dollars just to put some people on this lifeless rock?! I'll tell you what, I'll tell you what, with just one billion dollars 100 million children on this planet could have been saved from sure death! Explain this! Explain this lunacy! And I will tell you one more thing: I know a primitive culture somewhere in the jungle. They did not land on the moon, they don't have cable TV, they even don't have any electricity, but they are happy! They are happy! Explain this lunacy, explain it!"

Okay, let's say I am a famous researcher, I go visit this primitive culture, that is still happy without modern technology. I go to them and ask them: "Are you crazy? You have no technology and you are still happy?! Why?" And they will tell you something like the following: "Well, we have some simple rules: We don't kill each other, we don't kill more animals than we need, we live in harmony with mother nature." - "But who told you that?! Who?! I want the truth! The TRUTH!!" - "Well, our forefathers tell us a crazy story. They tell us, that on one beautiful day, long long long long ago, there came a fireship from the sky. From this fireship came a good human being (a good extraterrestrial!) and he told us some simple rules: "Look, you good human beings, you can't live on like that. You need to stop eating each other on this planet. I will give you some simple rules, and as long as you follow these rules, you will always be happy! You will always be happy!"

And this is why human kind needs to expand into the universe. To do some good to the universe. We are ripe enough, we have reached SELF ABSOLUTION!

Do you know, what Jesus was? He was sent from a spaceship orbiting earth. And this spaceship was called God. As an extraterrestrial with unbelievable technology, he could heal people and duplicate food.

## **Chapter 2**

### **An alternative Explanation**

My second theory about the visitors who educated our forefathers is, that they are not extraterrestrials, but humans from the far future, who have evolved, or degenerated, however you think about it, and have discovered time travel. So they are travelling back in time to correct the world or universe to the better.

## Chapter 3

### Turning this book into a movie

I would like to turn this tale into a movie. As long as I don't get enough help with this project, I am planning to do a short movie out of it, to convey the main message of this tale. Can you help me? Contact e-mail is [pascal@parvexfilm.com](mailto:pascal@parvexfilm.com) and my landline phone is as follows: +41 56 610 78 25. Thanks for your interest.

## Chapter 4

### Preliminary script for a short Film about the Ultimate Tale.

Location: Where Jesus was buried.

Jesus has disappeared from his grave. The stone of the tomb has been moved away, and the body is no longer there. Two peasants enter the grave and look around. Suddenly, they are dissolving, as they are teleported away.

Location: Space Ship „Jehovah“.

They reappear in an unknown room somewhere else. The room is made of shiny metal, and there is a window. The peasants look out of the window and see the earth from space. They realize, that they are floating above their home. The camera views them looking through the window from outside, zooming away. The letters „Jehovah“ appear on the side of the spaceship.
